

# Every student should feel safe at school!

- Schools should be Safe Zones, where every student can learn and grow without fear.
- The Supreme Court has ruled that every child has an equal right to public education, regardless of immigration status or the status of their family.
- We must lead by example, which requires us to make a public commitment to support the right of all our children to receive a quality education in a safe, secure learning environment.
- Our students are not policy problems or pawns in a political game. They are kids entrusted to our care, and they need to know we will stand up for them.
- The local school board needs to pass the TSTA “Resolution Regarding the Board’s Commitment to a Safe Zone for Learning,” and put our district on record as standing with all of our students.

**In these difficult times, let’s not let our students down.**
